

Defronix SOC L1 Walk-through

Why SOC exist?

⇒ Organizations bleed data and money.
The SOC exists to minimize "Dwell Time"
- the time an attacker stays hidden.
Without SOC breaches are discovered
by customers or the FBI, causing
massive reputational and financial
loss.

Problem: 24/7 Global Cyberattacks

SOC solution: Continuous monitoring
and rapid triage

SOC vs NOC vs IR

Example by Castle

SOC: Watch tower with Sniper

NOC: Castle fence and walls

IR (Incident Responders):

Defend troops special if breaks...

SOC: Monitors security events, detects threats, analyzes alerts

NOC: Monitors network performance, uptime, bandwidth

IR: Responds to confirmed incidents, performs forensics, containment.

Cyber Attacks

⇒ WannaCry Ransomware attack 2017
* 200,000+ computers affected

⇒ Equifax breach
147 million+ records leak

⇒ Lastpass 2022 incident
