

Phase 2: L1 Analyst Life

The Triage Process (L1 Loop)

1. Alert (SIEM Triggers rule)
2. Analysis (Check IP, Hash, users)
3. Decision (False vs. True positive)
4. Action (Close or Escalate (L2))

Critical L1 Mistake

Ignoring alerts because "It's probably nothing" or failing to document findings in the ticket.

If it isn't documented, it didn't happen.
