

SOC Team: A SOC (Security Operation Center) is a dedicated facility operated by a specialized security team. This team aims to continuously monitor an organization's network and resources and identify suspicious activity to prevent damage. This team works 24 hours a day, seven days a week.

Daily Duties Being a SOC Analyst

⇒ Detect and prevent a data stealer infection from/on a coworker's laptop.

⇒ Analyze and stop a phishing campaign targeting the finance team

⇒ Participate in a bigger incident such as a full-scale ransomware attack.

- ⇒ Team-up with your teammates to build detection tools and automation
- ⇒ Go beyond cyber and understand how companies operate from inside.

As a Tier-1 SOC Analyst

- i) Monitor SIEM, EDR/XDR, Firewall, email alerts
- ii) Validate Alerts: True or false positive
- iii) Escalate critical events to Tier-2 or IR
- iv) Log everything in ticketing system.
