

Phase 4 : Know your Enemy

You cannot defend against what you don't understand.

Top Attack Vectors

i) Phishing

Log: Email gateway

Look for: typo squatting domains, urgency in subject, suspicious attachments (iso, exe)

ii) Brute Force

Log: Active Directory/Azure AD

Look for: 4625 (Failed login) x 100 followed by 4624 (success)

iii) Ransomware

Log: EDR/File Server

Look for: Mass file modifications, volume shadow copy detection ('vssadmin delete shadows')
